DETAILED ACTION***Allowable Subject Matter***

Claims 1,3-4 and 6-10 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to systems and methods for generating and compositing digital images of two or more image layers. Each independent claim identifies the uniquely distinct features "determining an alpha value for the pixel as one plus the value of a single color component of the pixel from the image layer scene rendered over full black minus the value of the same color component of the corresponding pixel from the image layer scene rendered over full white; setting all of the color component values of the pixel to zero if the alpha value for the pixel equals zero; otherwise setting the color component values of the pixel to the corresponding color component values of the corresponding pixel from the image layer scene rendered over full black divided by the alpha value of the pixel". The closest prior art, O'Connor et al (US 5,638,499) discloses a similar system, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
